When aluminium  
becomes architecture

Discover vestis®, where aluminium meets versatility and innovation. Our laminates come in a wide array of colours and finishes to meet your unique aesthetic needs, from matte to glossy, rough to textured, and more.

Vestis® features a durable paint formula, preserving its beauty over time. Its elasticity allows it to gracefully adapt to even the most complex folds, enabling creative architectural projects.

Experience vestis® and bring your architectural vision to life with durability, beauty, and flexibility.

**Lightness, corrosion resistance, and versatility are the key features that make vestis® the ideal metal for cladding systems.**

Our rainwater system - including gutters, downpipes and the related accessories, all made with the same finish is designed to achieve perfect aesthetic integration with vestis® cladding. Easy to install and distinguished by excellent quality, it enhances the project's value by ensuring functionality and durability.

---

#### 01 \_ VESTIS®

High-performance aluminum ideal for superior cladding solutions.

---

#### 02 \_ THE SKIN CLIPS

Concealed indirect fasteners for maximum load-bearing strength.

---

#### 03 \_ THE SKIN AIR

Separator layer with anti-vibration and anti-condensation properties when needed.

---

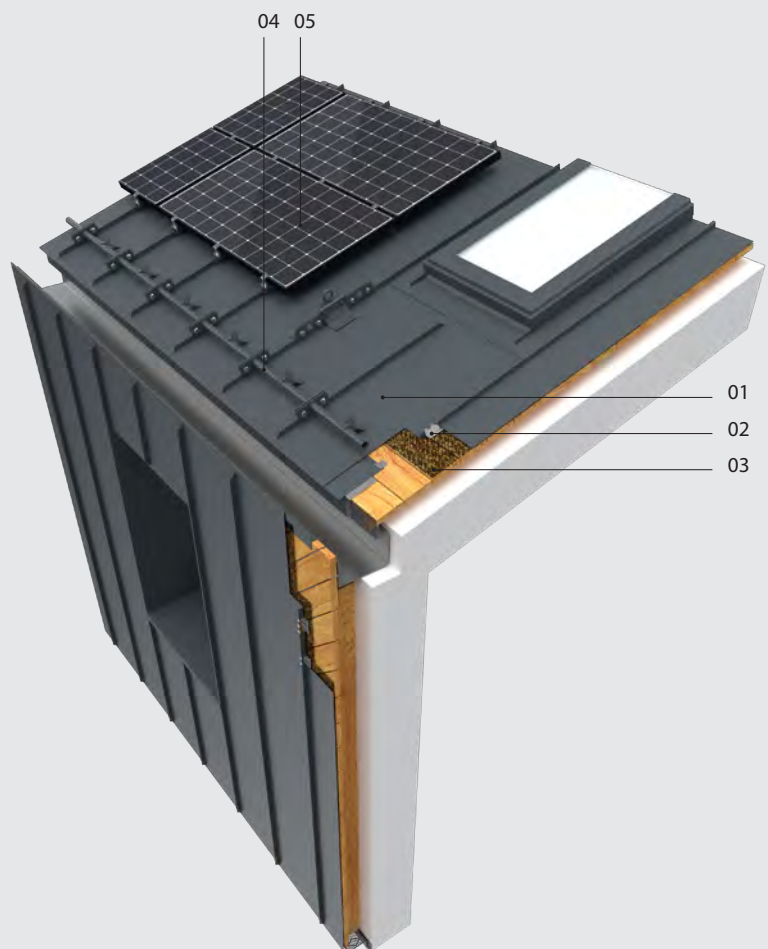

#### 04 \_ SNOW PROTECTION

Comprehensive system: supports the load and prevents snow cover slippage.

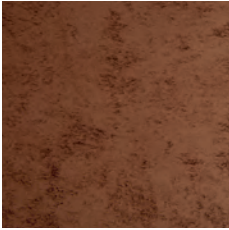

---

#### 05 \_ TECHNICAL SYSTEMS

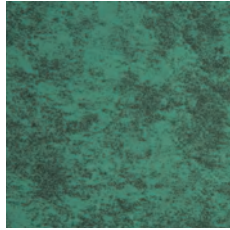

Installation preparedness for solar systems without the necessity of puncturing the roofing.
